View From The Edge Of The Crowd by Lee Schell

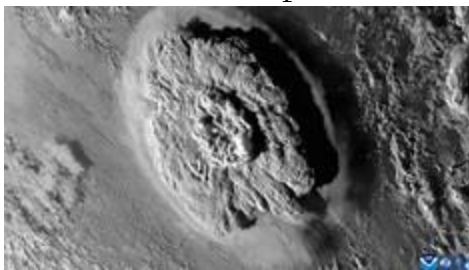

The latest and most grievous example of why we can't believe anything we hear, see or read in the so-called news media these days happened on Wednesday, July 23rd. Tulsi Gabbard, President Trump's Director of National Intelligence, made a surprise appearance at the daily White House press briefing, in which she carefully outlined evidence she says directly implicates former President Obama as the ringleader of the plot to discredit newly elected President Donald Trump after he beat Hillary Clinton back in 2016.

Gabbard read from a report including information from an intelligence insider whistleblower, which laid out the move to falsely connect Trump with the Russians and a bogus report claiming that the Russians actually manipulated the vote count in the election, causing Trump to win over Clinton. Obama and his directors of the FBI, CIA and other intelligence agencies deliberately altered data that was unreliable to implicate Trump and discredit the election. This story is HUGE but what really ticks me off is that only Fox News covered the Wednesday press briefing, live, and only CBS had a short story about it on their evening newscast. ABC, NBC, MSNBC, CNN etc., all ignored it. Why? Because all these news agencies over the four years of Trump's first term got behind this B.S. story and pushed it, many journalists knowing that it was patently false. After Wednesday's groundbreaking announcement, all they and the New York Times and Washington Post newspapers could talk about was that Trump's name allegedly appeared in documents relating to the Jeffery Epstein saga. Believe me, this is direct evidence that there is no free flow of reliable news in this country and that the legacy news media is out to get Trump no matter what! Are you surprised? I didn't think so.

Now to segue to all of the disastrous flooding going on around the country: The Climate Change advocates are having a field day. People are dying. Property is being destroyed. Subways are flooded. Governments are overwhelmed...Whoopee..."we were right!" What a bunch of idiots. Here's what really is happening:

Back on January 15th, 2022, a huge, underwater volcano now called Hunga Tonga-Tonga Ha'apai, suddenly came to life and literally blew its top. Except for a couple of mentions in scientific journals, this event was never reported in the mainstream media because we were all caught up in the Covid-19 debacle. Why does this have anything to do with our current weather emergencies, you ask? Because of that eruption 490 feet below the ocean's surface, over one hundred fifty thousand metric

tons...that's about forty *trillion* gallons of superheated seawater was instantly injected into the atmosphere. It was blasted into the stratosphere and was distributed all over the globe. Despite a passage of three years, researchers are just now concluding that Hunga Tonga was one of the most remarkable climate events in modern history and its effects may be with us for many years to come. Why is this so significant? It's the old adage: What goes up *must* come down. All of that moisture will eventually return to the surface in the form of rain and boy, just ask the folks in Texas and the Ohio river valley and along the I-95 corridor and in Europe and Asia and the Indo Pacific region where unprecedented downpours are occurring, causing immeasurable damage and loss of life. Thanks to our so-called news media we never heard about Hunga Tonga because the eruption doesn't help their political narrative that climate change is man made. Politics and legislation cannot change what Mother Nature does so scientists are baffled. Give me a break!

PRESIDENT'S MESSAGE

In closing, I hope we can continue to keep up with our President who continues to tirelessly MAKE AMERICA GREAT AGAIN.

IN CASE YOU MISSED IT - Kathy Forgnone

It has been a nice break for the summer and I hope all of you made great memories with family and friends. I was especially happy to meet one of our two Scholarship recipients and her family for dinner a couple weeks ago. Miss Hayden Munoz, King City High School graduate, her mother, Megan and father Tige, met me at the Cork and Plough for dinner. On behalf of the SMCRWF, I presented her with a check for \$1,000, a card and bouquet of roses. Hayden was unable to attend our August 5th meeting due to an internship in Berkeley, after which she will begin attending U.C. Berkeley. She and her family are indeed true patriots, and Hayden recognizes the challenges college life will pose.

Thanks to all of you for your hard work and contributions towards raising the funds to support Hayden and Amity Hearne this year. Amity and her family will join us for our general membership meeting dinner Tuesday, August 5th at 5:30 pm at the Cork and Plough Restaurant.. Please get your reservations and menu choice (*Cheeseburger/fries or Grilled Chicken Farm Salad*), in as soon as you can.

Gabbard told Fox News Digital that this "is not a partisan issue," but one that "concerns every American."

"The information we are releasing today clearly shows there was a treasonous conspiracy in 2016 committed by officials at the highest level of our government," Gabbard told Fox News Digital. "Their goal was to subvert the will of the American people and enact what was essentially a years-long coup with the objective of trying to usurp the President from fulfilling the mandate bestowed upon him by the American people."

Gabbard said the "egregious abuse of power and blatant rejection of our Constitution" by Obama-era officials "threatens the very foundation and integrity of our democratic republic."
